PROFESSIONAL SUMMARY

Senior QA Automation Engineer / SDET with Strong Hands-On Experience in SaaS, UI, Web E2E, API, Backend Validation and CI/CD Quality Gates.

Skilled in Playwright, Selenium, Python, TypeScript, Java, REST Assured, Postman, SQL, Git, Jenkins and GitHub Actions.

At ZoomInfo, Owned Automation Coverage Web Applications & Backend Microservices, Built Scalable Frameworks, Reduced Flaky Tests, Analyzed CI Failures and Supported Release Go/No-Go Decisions.

CORE SKILLS

QA & Test Strategy: Test Plans, Test Scenarios, Regression, Sanity, Exploratory

Programming: Python, TypeScript, Java, C#, OOP

CI/CD & SDLC: Jenkins, GitHub Actions, Git, CI quality gates, shift-left testing

Collaboration: Agile/Scrum, developers, product managers, DevOps, mentoring

Runtime: Docker, Linux/macOS CLI, shell scripting exposure

Automation: Playwright, Selenium, Pytest, TestNG, Cucumber, REST Assured

API & Backend Testing: REST API, Postman, Swagger, GraphQL exposure, SQL validation, log analysis

Debugging & Reporting: Allure, DataDog, Docker Container logs

Tools: Jira, Confluence, DataGrip, Playwright Trace Viewer, Playwright Inspector

PROFESSIONAL EXPERIENCE

ZoomInfo – Senior Automation Engineer / Senior SDET

2020 – Present

SalesOS — SaaS Cloud Native GCP / AWS Complex Multi Integrated CRM Platforms

- Designed, Implemented and Maintained Automated Test Coverage for Web UI, E2E Workflows, REST APIs and Backend Microservices.
- Built Regression, Sanity and Release Quality Gates Using GitHub Actions, CI/CD Pipelines and YAML Workflows.
- Developed Scalable Automation Frameworks Using Playwright, TypeScript, Python, Java, Selenium, TestNG and REST Assured.
- Applied Page Object Model, Service Layer, Data Access Layer, Dependency Injection, Singleton, Builder and Factory Design Patterns.
- Designed Test Plans Covering Product Requirements, User Journeys, Business Logic, Edge Cases, Permissions, Data Changes and System Behavior.
- Built Shared Automation Infrastructure, Including Logging, Reporting, Utilities and Reusable Libraries.
- Collaborated with Cross-Functional Agile Teams to Drive Shift-Left and Risk-Based Testing.
- Tracked and Reported Defects with Clear Reproduction Steps, Technical Evidence and Business Impact.
- Mentored Automation Engineers in Framework Design, Test Architecture, CI Debugging, Flaky-Test Reduction and Maintainable Automation Practices.

Samsung – Automation Engineer

2017 – 2020

- Built Java, Cucumber and Selenium Automation for Angular and React Web Applications Using Page Object Model and Service Layer Patterns.
- Developed REST API Automation with REST Assured, JSON Mocks and Swagger for IoT and Automotive Connected Services.
- Maintained Jenkins CI Automation, Regression Coverage, Defect Analysis and Release Validation.

OTI GLOBAL LEADER IN SECURED DIGITAL SOLUTIONS – QA Automation Engineer

2014 – 2017

- Built C# and Ranorex Automation for Desktop and Web Applications in Border Control and Biometric Systems.
- Tested Client-Server Flows, Hardware-Software Integrations, Database States and Reporting Outputs.
- Used SQL, Logs and QA Tools for System Validation, Defect Analysis and Release Readiness.

EDUCATION & CERTIFICATIONS

B.Sc. Electronic & Computer Engineering – Tel Aviv University Branch, AFEKA

Certified Backend Java Developer – Microservices, Web Services, Spring Boot

Certified Frontend Web Developer – ReactJS ES6 / JSX

MCSD Certified – Microsoft Certified Solutions Developer

ISTQB Certified Tester Foundation Level Agile Tester (CTFL-AT)
